IN THE RED SEA ON BOARD
THE ALL STAR SCUBA SCENE
THE RED SEA'S NEWEST LIVEABOARD
JUNE 9-16, 2025
\$2,195.00
BASED ON DBL OCC

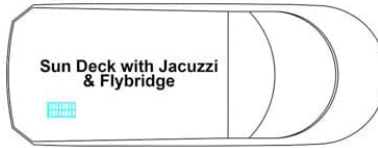

From stern to bow, the dive liveaboard All Star Scuba Scene is a first-class vessel. Few details have been left unattended. As quick example, the dive platform features freshwater hoses, two rinse tanks and two open-air showers. The dive deck is well designed with a washer and two dryers, ample equipment storage and a large camera table.

The lower deck houses a spacious restaurant. The main level features the dive deck and platform and eight (8) air conditioned cabins each with seaviews and ample storage space. The upper deck is home to a swimming pool and sundeck with comfortable chaise lounge chairs, shaded pool bar, a TV room with entertainment options and six (6) cabins. One level up find another shimmering sundeck with sun and shaded seating and views of the Red Sea and an air-conditioned salon for group gatherings. The top sun deck has a jacuzzi tub, lounge chairs and the flybridge.

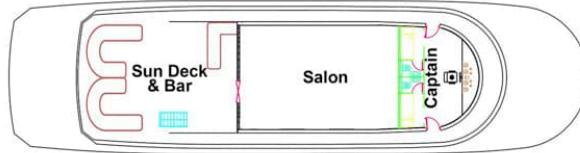

Each cabin features a private bathroom and adjustable temperature-controlled air conditioning. All electrical outlets are universal with USB ports. Cabin #1-6 and 9-14 offer large ocean-view windows and a small seating area. Cabins # 7 & 8 are slightly smaller with two beds, a twin (.9m x 2m), and a double bed (1.3m x 2m).

M/Y SCUBA SCENE

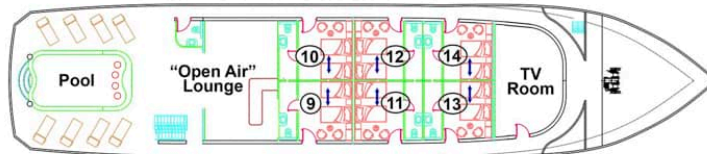

(length: 48.5 m - width 10 m)

Pool Deck (Deck C): Pool & Sundeck, Open Lounge, 6 Guest Cabins & TV Room

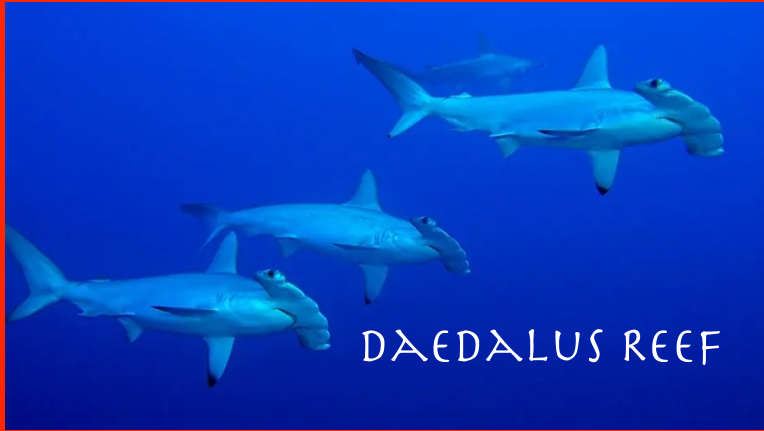

Main Deck (Deck B): Dive Deck & Platform, 8 Guest Cabins & Crew Quarters

Lower Deck (Deck A): Engine Room, Kitchen, Dining Area, Guide & Crew Quarters

Much like the Brothers Islands, Daedalus also sits in open water a good distance from the shore and has a manned lighthouse. With year-round viewing of hammerheads, Daedalus is a unique locale. Divers may also encounter oceanic whitetips, grey reef and thresher sharks. Tunas, trevallies and manta rays are seen here too.

Rocky Island is a pelagic hotspot! Whale sharks, manta rays and leopard sharks are known to quickly swim into focus in the turquoise blue waters. Divers will want to keep a watchful eye for new arrivals. Take time to soak in the wall itself and enjoy fantastic corals and reef creatures.

Frequent pelagic sightings have earned this southern Egypt dive region a highly favorable reputation. What pushes Zabargad over the top is the mysterious Russian shipwreck, graceful sea turtles and diverse bird species. The unique topography of pinnacles and sloping walls, decorated with colorful soft corals, surrounds this beautiful island.
